

HOSTEL MANAGEMENT PORTAL

Under the guidance of Dr. Puneet Goyal

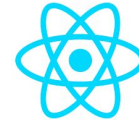

Submitted By:

Akanksh Caimi (2021CSB1064)

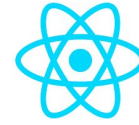

Problem Statement

The existing manual hostel accommodation process, reliant on pen, paper, and Excel sheets, is characterized by inefficiencies and a lack of transparency. This outdated system results in time-consuming administrative tasks and a higher likelihood of errors. To address these challenges, our project focuses on developing a web application specifically designed for hostel management. This digital solution aims to automate and streamline the accommodation process, providing a user-friendly interface for students and administrators. The goal is to enhance efficiency, accuracy, and overall effectiveness in managing hostel accommodations.

Motivation

The motivation for developing a web application for hostel management lies in addressing the inefficiencies and challenges of the current manual system. By introducing automation and a user-friendly interface, our aim is to streamline processes, reduce errors, and provide a more efficient and transparent accommodation allocation system for both students and administrators.

Stakeholders

1. Students:

- Primary users, seeking a seamless and user-friendly accommodation process.
- Utilize the web application to lodge and track complaints.

2. Hostel Caretakers:

- Responsible for efficient allocation, addressing complaints and management of hostel accommodations.

3. Hostel Wardens:

- Oversee and coordinate accommodation assignments of hostels.

4. Institute Administration:

- Monitors and evaluates the efficiency of the hostel allocation system.

Tech Stack

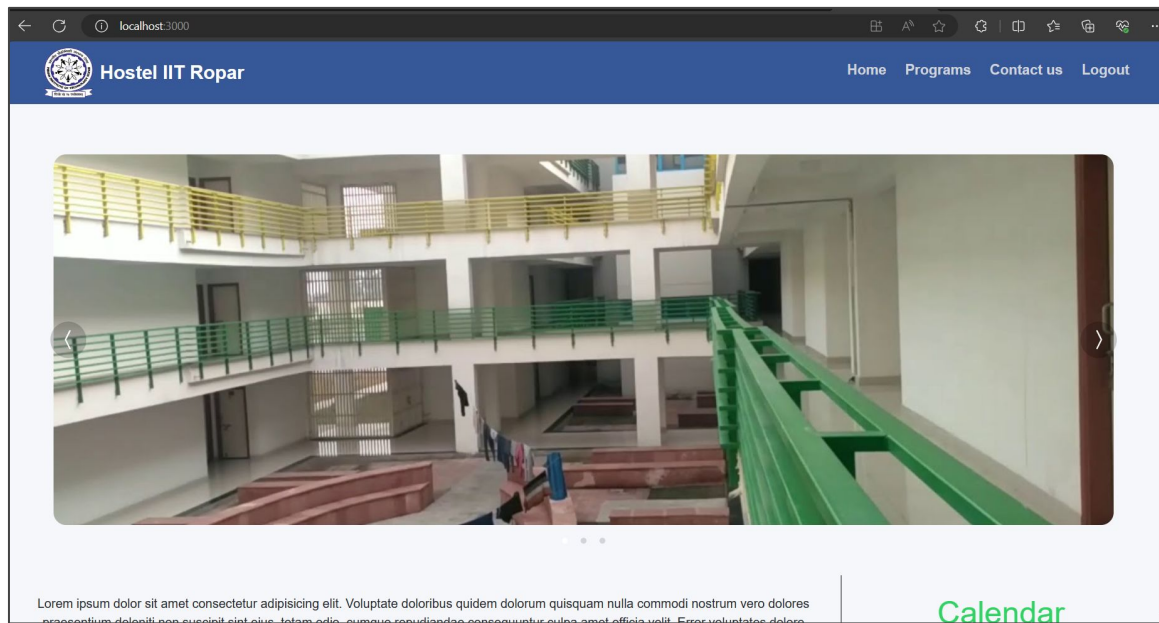

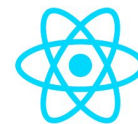

We are using the following Tech Stack :

- React.js (Frontend)
- Tailwind (UI/UX)
- Django (Backend)
- SQLite (Database)

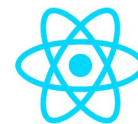

Home Page

The website's home page showcases interactive features such as a functional navigation bar, rolling images, a calendar to mark important dates, and a footer with contact details.

Feature 1: Application Management for Summer Interns

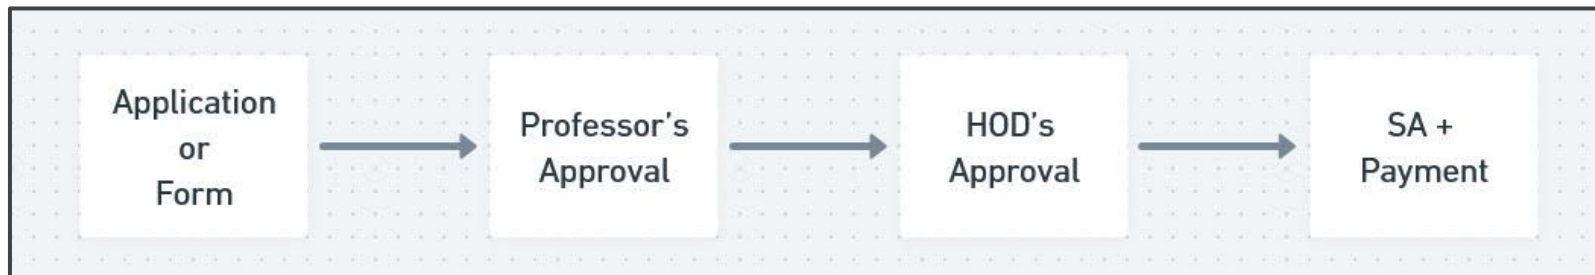

Workflow of Feature 1

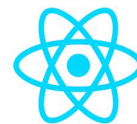

The first major feature has been implemented to streamline the process for summer interns students from outside our college. For them, the workflow is as follows:

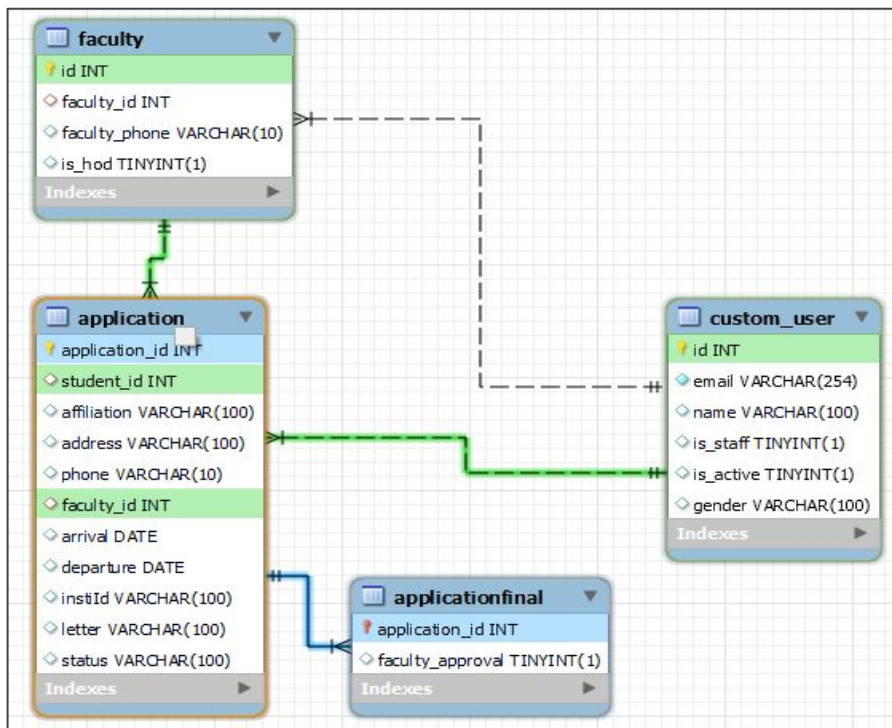

Database Schema

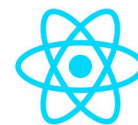

django

Application Form

localhost:3000/form

Hostel IIT Ropar Home Programs Contact us Logout

Name of the student Intern:

Gender:

Affiliation of the student Intern:

Address:

Contact Number:

Email:

Name of the Faculty Mentor:

Faculty Mentor's Email:

Date of arrival:

Date of departure:

Copy of your Institute ID No file chosen

Copy of Official Letter from your Institute No file chosen

Remarks:

*Hostel room rent: Rs. 150/- per day per person or Rs. 3000/- per month which is less, Security (refundable) Rs. 10000/-

The application form can be filled out by student interns, eliminating the need for pen and paper and streamlining the workflow.

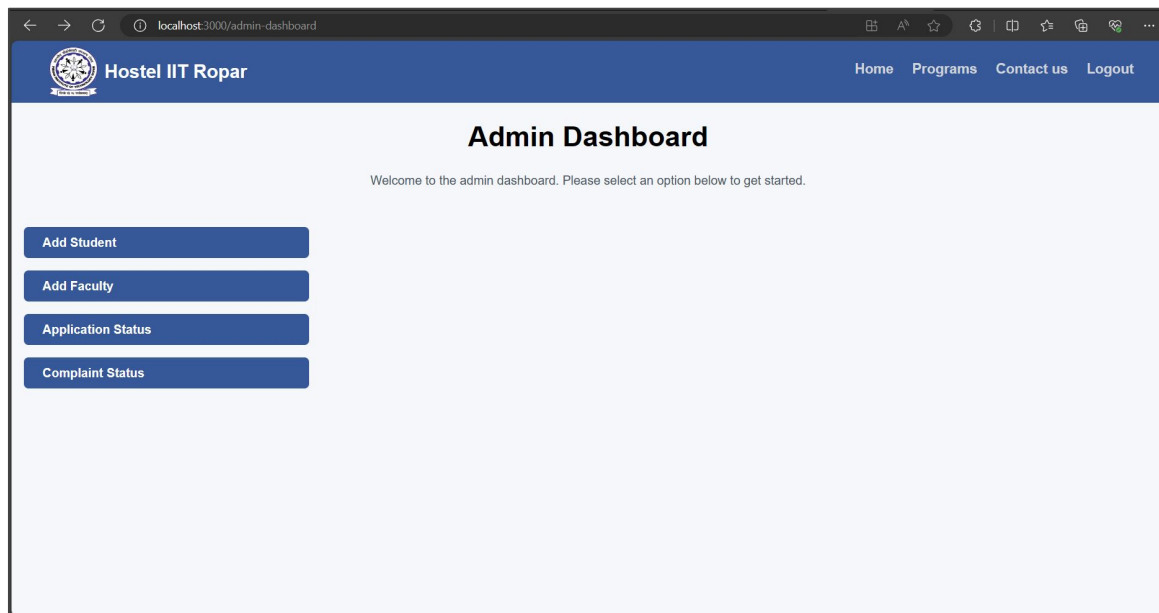

Feature 2: Admin Endpoints

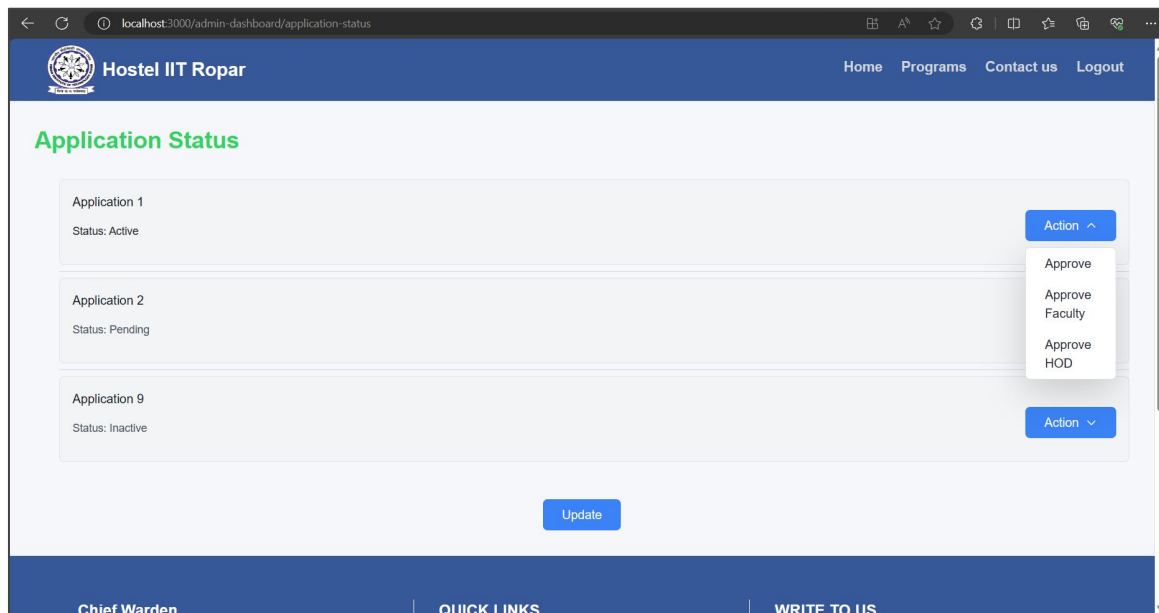

Admin Dashboard

The admin dashboard includes features such as adding students and faculty to the management portal, checking the application status of student interns, and monitoring the complaint status of the hostels.

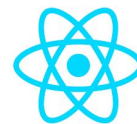

Application Status (All)

The application status page is only visible to admins and concerned professors who can change the status of the application from the dropdown with a single click.
